

Sajitha Beevi S

Python-Django Full Stack Developer

👤 Profile

As an aspiring Python developer, I'm passionate about building efficient, scalable solutions and continuously expanding my technical expertise. I've worked on various web applications, including an e-commerce platform and a CV builder, and thrive on tackling new challenges. With skills in Python, Django, and problem-solving, I'm eager to contribute to innovative projects and grow within the field.

💼 Employment History

Python Django Intern at Luminar Technohub, Kakkanad

October 2024 — Present

- Currently working on the backend development of a college website using Django and Python.
- Implemented a custom user model based on `AbstractBaseUser` for enhanced user authentication and management.
- Developed REST APIs for user interactions and integrated `SimpleJWT` for secure token-based authentication.
- Set up email verification using SMTP and OTP for user account validation.
- Utilized SQLite for database management, ensuring efficient data handling and storage.

⚙️ Courses

Python Django React Full Stack Development, Luminar Technolab

January 2024 — September 2024

★ Projects

E-Commerce Website

Python, Django, SQLite, HTML, CSS

Designed and built an e-commerce website that allows users to shop online easily. I created a simple platform for buying products and improving the shopping experience.

CV Builder

Python, Django, SQLite, HTML, CSS, Bootstrap

Designed and built a CV builder that allows users to create and download their resumes in PDF format.
